Postgraduate Programme Specification

Introduction: What are programme specifications?

Programme specifications focus on single programmes of study, and outline the intended knowledge, understanding, skills and attributes of a student successfully completing that programme. A programme specification also gives details of teaching and assessment methods as well as linking the programme to the Framework for Higher Education Qualifications and any subsequent professional qualification and career path.

Since the College gained Taught Degree Awarding Powers in January 2017 it validates the programmes taught at Rose Bruford College and as part of the validation process, the College produces approved programme specifications for all the programmes that it offers. On some programmes, The University of Manchester validates the award for students who have opted to remain on a University degree.

This programme specification forms one part of a set of different types of document about your programme that also includes the prospectus, module specifications and information on the College's website and VLE. The Programme Specification is published on the College's website.

There may be concern that 'specifying' what a student will have learnt at the end of the programme might inhibit innovation within that programme. For this reason it is important not to see programme specifications as 'tick lists'. They offer broad indications of what students might be expected to learn and the types of skills and abilities they might be expected to gain.
